About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 15 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	7
2 Normative references.....	8
3 Terms and definitions	8
4 Test scope, schedule and duration.....	11
5 Equipment and measurements	11
6 Procedure	12
6.1 Overview.....	12
6.2 Calculation and documentation of predicted energy and the method that will be used to calculate the expected energy	14
6.2.1 General	14
6.2.2 Definition of test boundary to align with intended system boundary	14
6.2.3 Definition of the meteorological inputs used for the prediction	15
6.2.4 Definition of the PV inputs used for the prediction.....	15
6.2.5 Definition of measured data that will be collected during the test.....	16
6.2.6 Definition of the model calculations	17
6.2.7 Predicted energy for the specified system and time period	18
6.2.8 Uncertainty definition	18
6.3 Measurement of data.....	19
6.4 Identification of data associated with unavailability.....	19
6.5 Identification of erroneous data and replacement or adjustment of such data and preparation of model input dataset	19
6.5.1 General	19
6.5.2 Data checks for each data stream	20
6.5.3 Shading of irradiance sensor	20
6.5.4 Calibration accuracy	21
6.5.5 Final check	21
6.5.6 Using data from multiple sensors.....	21
6.5.7 Substitution of back-up data for erroneous or missing data	22
6.5.8 Out-of-range data or data that are known to be incorrect.....	22
6.5.9 Missing data	22
6.5.10 Partially missing data or partial unavailability.....	22
6.5.11 Curtailment because of external requirement.....	23
6.5.12 Inverter clipping (constrained operation).....	23
6.5.13 Planned outage or force majeure.....	23
6.5.14 Grid support events (e.g. deviation from unity power factor).....	23
6.6 Calculation of expected energy.....	23
6.6.1 General	23
6.6.2 Measure inputs	24
6.6.3 Acceptability of data.....	24
6.6.4 Time interval consistency	24
6.6.5 Time stamp alignment.....	24
6.6.6 Calculate expected energy during times of unavailability.....	24
6.6.7 Calculate expected energy during times of availability.....	24
6.6.8 Calculate total expected energy.....	24
6.6.9 Analyse discrepancies.....	24
