About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

Useful links:

IEC publications search - www.iec.ch/searchpub

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,...).

It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

CONTENTS

FOREWORD.....	5
1 Scope and object.....	7
2 Normative references	7
3 Terms and definitions, symbols and abbreviations	9
3.1 Terms, definitions and symbols	9
4 Compliance with IEC 60364.....	15
5 PV array system configuration	16
5.1 General.....	16
5.1.1 Functional configuration of a PV system	16
5.1.2 PV system architectures	16
5.1.3 Array electrical diagrams	16
5.1.4 Use of PCE with multiple d.c. inputs	21
5.1.5 Series-parallel configuration	22
5.1.6 Batteries in systems	22
5.1.7 Considerations due to prospective fault conditions within a PV array	22
5.1.8 Considerations due to operating temperature	23
5.1.9 Performance issues	23
5.2 Mechanical design.....	24
5.2.1 General	24
5.2.2 Thermal aspects	24
5.2.3 Mechanical loads on PV structures	24
5.2.4 Wind.....	24
5.2.5 Material accumulation on PV array	24
5.2.6 Corrosion.....	24
6 Safety issues.....	25
6.1 General.....	25
6.2 Protection against electric shock	25
6.3 Protection against overcurrent.....	25
6.3.1 General	25
6.3.2 Requirement for overcurrent protection.....	25
6.3.3 Overcurrent protection in PV systems connected to batteries	25
6.3.4 Requirement for string overcurrent protection	26
6.3.5 Requirement for sub-array overcurrent protection	26
6.3.6 Overcurrent protection sizing	26
6.3.7 Overcurrent protection location	28
6.4 Requirements for PV arrays operating at DVC-B and DVC-C voltages.....	29
6.4.1 Detection and alarm requirements	29
6.4.2 Earth fault alarm	31
6.5 Protection against effects of lightning and overvoltage	32
6.5.1 General	32
6.5.2 Protection against overvoltage.....	32
7 Selection and erection of electrical equipment.....	32
7.1 General.....	32
7.2 PV array maximum voltage.....	33
7.3 Component requirements	33
7.3.1 General	33

7.3.2	PV modules	34
7.3.3	PV array and PV string combiner boxes	34
7.3.4	Circuit breakers	34
7.3.5	Disconnectors and switch-disconnectors	35
7.3.6	Cables	35
7.3.7	Segregation of a.c. and d.c. circuits	38
7.3.8	Plugs, sockets and connectors	38
7.3.9	Wiring in combiner boxes	39
7.3.10	Fuses	39
7.3.11	Bypass diodes	39
7.3.12	Blocking diodes	39
7.4	Location and installation requirements	40
7.4.1	Disconnecting means	40
7.4.2	Earthing and bonding arrangements	42
7.4.3	Wiring system	46
8	Acceptance	47
9	Operation/maintenance	47
10	Marking and documentation	48
10.1	Equipment marking	48
10.2	Requirements for signs	48
10.3	Identification of a PV installation	48
10.4	Labelling of PV array and PV string combiner boxes	48
10.5	Labelling of disconnection devices	48
10.5.1	General	48
10.5.2	PV array disconnecting device	48
10.6	Documentation	49
Annex A (informative)	Examples of signs	50
Annex B (informative)	Examples of system functional earthing configurations in PV arrays	51
Annex C (informative)	Blocking diode	53
Annex D (informative)	Arc fault detection and interruption in PV arrays	57
Annex E (informative)	DVC limits	59
Bibliography	60
Figure 1	– General functional configuration of a PV powered system	16
Figure 2	– PV array diagram – single string case	17
Figure 3	– PV array diagram – multiple parallel string case	18
Figure 4	– PV array diagram – multiple parallel string case with array divided into sub-arrays	19
Figure 5	– PV array using a PCE with multiple MPPT d.c. inputs	20
Figure 6	– PV array using a PCE with multiple d.c. inputs internally connected to a common d.c. bus	21
Figure 7	– Example of a PV array diagram where strings are grouped under one over-current protection device per group	27
Figure 8	– Reinforced protection of wiring	38
Figure 9	– PV array exposed-conductive parts functional earthing/bonding decision tree	43
Figure 10	– Exposed conductive parts earthing in a PV array	44

Figure 11 – PV string wiring with minimum loop area	46
Figure A.1 – Example of sign required on PV array combiner boxes (10.4)	50
Figure A.2 – Example of switchboard sign for identification of PV on a building	50
Figure B.1 – System functional earthing/grounding	51
Figure B.2 – Examples different PV configurations in common use	52
Figure C.1 – Effect of blocking diode at short circuit in PV string	54
Figure C.2 – Effect of blocking diode where there is an earth fault on a system with earthing on the minus side	54
Figure C.3 – Effect of blocking diode where there is an earth fault on a system with positive side earthing	55
Figure D.1 – Examples of types of arcs in PV arrays	57
Table 1 – Nominal overcurrent rating of functional earth fault interrupter	28
Table 2 – Requirements for different system types based on PCE isolation and PV array functional earthing	29
Table 3 – Minimum insulation resistance thresholds for detection of failure of insulation to earth	30
Table 4 – Response time limits for sudden changes in residual current	31
Table 5 – Voltage correction factors for crystalline and multi-crystalline silicon PV modules	33
Table 6 – Minimum current rating of circuits	36
Table 7 – Disconnection device requirements in PV array installations	41
Table E.1 – Summary of the limits of the decisive voltage classes	59

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**PHOTOVOLTAIC (PV) ARRAYS –
DESIGN REQUIREMENTS**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. In exceptional circumstances, a technical committee may propose the publication of a technical specification when

- the required support cannot be obtained for the publication of an International Standard, despite repeated efforts, or
- the subject is still under technical development or where, for any other reason, there is the future but no immediate possibility of an agreement on an International Standard.

Technical specifications are subject to review within three years of publication to decide whether they can be transformed into International Standards.

IEC 62548, which is a technical specification, has been prepared by IEC technical committee 82: Solar photovoltaic energy systems.
